

FOR THE PURIST — REAL COCKPIT INSTRUMENTS

A Tip From the July 2015 Cloudbusters Newsletter, Chris
Boehm, Editor

For those who demand only the best in cockpit detail, there's a website where you can get images of the actual cockpits from several countries, including the 1930s, WWI, WWII and general aviation US. Simply click on the instrument you want, drag it to the desktop and resize it to your liking. They can supply decals to whatever size you want for a fee. The site is:

www.aerocockpit.com/en/

Here are some samples:
