

# WWI GERMAN MARKINGS

*Printed in the October 2009 issue of Scale Staffel, Gerald Sullivan, Editor*

A neat method of obtaining symmetrical WW I style crosses. Fold a square of paper shown, point X being the intersection of all folds. Draw one leg of the cross as in Step 4, then cut. Open out the cut paper, then rubber-cement onto stiff card to make a template around which to draw. (PFFT Ed Note: if you'll do this with light bond paper, sand the back of the cross to further lighten the paper, you can paint the cross and glue it directly to the tissue with glue stick.)
