

PAINT JARS FROM AVON

By Ken Achée

Here's something I've discovered. It may be old hat to some but perhaps others haven't heard about it.

Check with your wife, daughter, girlfriend or all three. See if one of them uses AVON face cream in the 2 oz jars. Tell her to save them for you. They're heavy glass with an easy-to-remove label and they make wonderful paint jars. The wide bottom, low center of gravity and heavy weight make them almost impossible to turn over. The teflon like seal seems impervious to acetone based paint.
