

# SUPER GLUE FOR PLASTICS

An article in a recent Wingtips newsletter discussed a Loctite product made especially for difficult-to-bond plastics. As many of us have learned, ordinary CA often doesn't work all that well with certain plastics. The name of this stuff is called Loctite Plastics Bonding System. Below is what the package looks like. If you can't find it in your favorite hardware store, you can always order it on line at [http://www.loctiteproducts.com/p/4/2/sg\\_plstc/overview/Loctite-Plastics-Bonding-System.htm](http://www.loctiteproducts.com/p/4/2/sg_plstc/overview/Loctite-Plastics-Bonding-System.htm)
